Re: MVD/St. Gobain Settlement Update

Please see below for information provided by Merrimack Village District's outside Counsel.

"The attorneys for both St. Gobain and the Merrimack Village District have been diligently working on a proposed settlement to facilitate construction of a water treatment facility for MVD wells 4 and 5. This process has been time consuming due to the technical nature of these issues as well as the need for consultant input at various stages of the negotiations. Care is required to ensure a satisfactory resolution of the MVD claims against St. Gobain. We hope, but cannot guarantee, to have an agreement in place within the next 90 days to continue with the Merrimack Village District plans to fully treatment MVD wells 4 and 5 for PFOA contamination."

*Respectfully submitted,
Bernstein, Shur, Sawyer and Nelson, PA
Gregory Michael
